

National Gas Metering Customer Portal

FAQ's

1. 'I currently have a Portal account; do I need to setup a new account for the new Portal?'

No, if you have logged into your currently Portal account within the last 6 months upon go live you will receive an activation email with your login details to our new Customer Portal.

2. 'What will my username be?'

Your Username will be your company email address plus a unique 13 digit number, this will be shared on the initial activation email.

3. 'How do I create an account?'

Managers in your organisation who have been granted access to the New Portal will be able to create accounts.

4. 'I can't log into the portal and it's affecting all users in my company.'

Please call our Customer Service Centre 0800 001 4340 (Freephone) immediately to raise the fault with the portal.

5. 'I've forgotten my password.'

On the log on page of the portal you will see a forgotten password link, type in your username, and select reset. You will then receive an email with a link to reset your password.

6. 'What jobs can I raise on the new Portal?'

You can now raise all job types and requests via our New Customer Portal.

7. 'How do I raise a job?'

You can search via the MPRN on the home page or select Create Request in the left side panel. From here you can then select the specific request type such as Customer Work Request, Off Gas, AMR, Data Query etc.

8. 'How do I view job status?'

Search via MPRN and then select 'Request log,' you will then see all requests raised for that MPRN. You can then select the REQ number and view status updates or completion details.

9. 'Can I add more access instructions after the job is raised?'

Yes, search via MPRN, go to Request Log and select the job, you can then Provide Supporting Information.

10. 'Are there any more detailed user guides on how to raise specific job/request types?'

Yes, click on the 'Help Centre' link within the footer page of the New Portal and you will be presented with various user guides on how to navigate yourself around the Portal and raise the different job/request types.
